PROFILE

Cloud-focused IT professional with hands-on experience in AWS and Azure, including cloud infrastructure deployment, monitoring, and CI/CD fundamentals. Strong background in cloud operations, DevOps tooling, and system support, with a keen interest in building scalable and reliable cloud solutions.

PROFESSIONAL EXPERIENCE

Core Day End Admin

07/2023 – 01/2026

JS Bank Limited

Karachi

- Automated and monitored EOD/COB banking routines using TEMENOS T24, ensuring 99% system uptime.
- Generated logs, backup reports, and handled reconciliation exceptions with swift resolution.
- Supported branch operations during UAT and Go-Live phases with effective coordination.
- Conducted regular system health checks and escalated incidents to tech support.
- Ensured smooth ATM network transactions and responded to outages proactively.

Network Security Analyst Internship

03/2026 – 04/2026

Tech Hierarchy Pvt Ltd

Remote

- Performed network traffic analysis using Wireshark to inspect DNS, ICMP, and HTTP traffic.
- Conducted port scanning and service enumeration using Nmap.
- Created basic IDS rules to detect port scans, suspicious DNS activity, and cleartext credentials.
- Configured and tested firewall rules using Windows Defender Firewall to block malicious IPs and ports.
- Validated security controls through simulated attack scenarios and traffic testing.

DevOps Internship

11/2025 – 12/2025

Cloudlem Pvt Ltd

Remote

- Executed 50+ Linux Commands for File Management, Permissions, Process handling, and system Navigation using Linux Terminals.
- Designed GitHub repository structures for startups and medium-sized organizations following best practices.
- Implemented GitHub Actions CI pipelines to automatically test Python applications using pytest.
- Containerized Python applications using Docker, including writing Dockerfiles and building images locally.
- Pushed Docker images to Docker Hub and verified deployments by pulling and running containers.
- Automated Docker image build and push using GitHub Actions with secure secrets management.
- Learned CI/CD concepts including Continuous Integration and Continuous Deployment workflows.
- Studied Infrastructure as Code (IaC) principles and Terraform fundamentals (providers, resources, state, CLI).
- Created basic architecture diagrams to explain CI/CD and container workflows.

IT Support Engineer Internship

07/2022 – 10/2022

Outwerk Solutions Pvt Ltd

Karachi

- Installed and configured operating systems, antivirus, and software for end-users.
- Provided Level 1 support and documented technical issues with resolutions.
- Handled employee onboarding/offboarding including access provisioning and asset management.
- Resolved LAN/Wi-Fi, printing, and backup-related issues.
- Maintained inventory and service logs of IT assets.

EDUCATION

Bachelor's in Computer Systems

Quaid-e-Awam University of Engineering Science & Technology

12/2016 – 11/2021

Nawabshah

SKILLS

Cloud Platforms

- Azure (VMs, VNets, NSGs, Storage, Azure AD), AWS (EC2, S3, IAM, VPC, CloudWatch)

DevOps & Tools

- Azure DevOps, CI/CD Basics, Azure CLI, PowerShell, Docker, Containerization

Monitoring & Backup

- Azure Monitor, Log Analytics, Recovery Vault

Networking & Security

- Subnets, Routing, VPNs, IAM

LANGUAGES

English

Urdu

CERTIFICATES

- AZ-900 Microsoft Azure Fundamentals
- AZ-104 Microsoft Azure Administrator
- CCNAv7: Switching, Routing, and Wireless Essentials
- AWS Certified Cloud Practitioner – 2025

PROJECTS

♦ Azure 3-Tier Web Application Deployment

Deployed a secure 3-tier architecture using Azure Virtual Machines, NSGs, and private networking.

♦ Azure Monitoring & Alerts

Deployed real-time CPU usage alerting for a Linux VM using Azure Monitor and Action Groups.

♦ AWS Cloud Fundamentals

Launched EC2 instances, created IAM users & S3 buckets, applied permissions, and used CloudWatch for monitoring system metrics and setting up basic alarms.

CLOUD PRACTICE

Provisioned, configured, and managed Amazon EC2 instances for hands-on cloud practice

Designed and tested networking setups in Microsoft Azure including VNets, NSGs, and Storage

Implemented monitoring, alerting, and log analysis using Azure Monitor and Log Analytics

Performed basic cloud troubleshooting and resource lifecycle management across AWS and Azure
